2 Warnings

2 warnings to address. Fixing these will lift your SEO score and improve search visibility.

WARNINGS — ADDRESS NEXT (2)

1 Structured Data

Social & Schema

No structured data (JSON-LD) found

Recommendation: Add JSON-LD structured data inside `<script type="application/ld+json">`. Start with Organization schema for your homepage. Add Article schema for blog posts, Product schema for e-commerce, FAQ schema for FAQ pages, and LocalBusiness schema for local SEO. Use Google's Rich Results Test to validate.

2 Image Dimensions

Links & Media

29 of 32 images missing width/height attributes

Recommendation: Add width and height attributes to all `<img>` tags: ``. This allows the browser to reserve space before the image loads, preventing Cumulative Layout Shift (CLS) — a Core Web Vitals metric.

Want us to implement every fix in this report?

Our SEO specialists resolve every issue above, build a full content & backlink strategy, and get your site ranking — fast.
